ENVIRONMENT, HEALTH AND SAFETY POLICY

ECO PROTECTION ENGINEERS PRIVATE LIMITED is a leading multi-disciplinary engineering and turnkey contracts company in the field of water, sewage and industrial effluents treatment plant projects. The Company is highly committed towards improvement of Occupational Health, Safety and Environment by achieving of EHS excellence through belief that all accidents are preventable. In pursuit this commitment, we strive to;

Creating a Healthy & Safe Environment to all stakeholders associated with all processes, including employed as sub-contractors and visitors.

Complying with relevant Occupational Health, Safety & Environmental Legislations and Other requirements related to EHS.

Establish procedures to recognize, implement, evaluate and monitor EHS performance.

Constantly upgrading Systems & Procedures towards conservation of Resources, preventing pollution, injury and ill health.

Enhancing EHS awareness amongst our employees including all Interested parties by Proactive communication and training.

Continual improvement of EHS performance by improving Operating practices and reviewing EHS Objectives & Targets. Prevention of adverse impact on environment through climate changes initiatives.

Develop a safety culture through active leadership, encouraging good safety performance through reward and recognition schemes.

To achieve above goals, the management will endeavour to maintain a safe and healthy working environment, will provide hazard free working equipment and machinery, necessary personal protective equipment's and medical assistance in case of any injury/accident.

Overall the management would like their stakeholders safe and healthy, actively participating in all safety activities and making it a safe place to work.
